## Technical Data Sheet

# MM-Release agent

### Product description

MM-Release agent prevents the adhesion between PolymerMetals and the surface of the base material.

In some cases the user of a PolymerMetal wants to avoid the adhesion of the PolymerMetal on certain places of the work piece's surface. Here we recommend the use of MM-Release agent.

Simply apply a thin layer of MM-Release agent on the concerned surfaces and polish after a short drying time. PolymerMetals do not bond on surfaces, which were treated with MM-Release agent.

Before the usage of MM-Release agent the tin's content must be shaken well. MM-Release agent can be applied by brush.

### Technical data

Consistency:	liquid
Colour:	milky white
Smell:	similar to hydrocarbon
Viscosity at 20 °C:	approx. 5,0 mPas
pH-value:	not applicable
Flash point:	- 5 °C
Density at 20 °C:	0,75 g/cm <sup>3</sup>
Features:	quickly dries; well polishable; high wax content; easy flammable; free of halogenated hydrocarbons

### Working security

Avoid eye and skin contact. In case of skin contact, wash thoroughly with soap and water. In case of eye contact, rinse thoroughly with water

### Storage

Product	Temperature commendation	Shelf life
MM-Release agent	~ 22 °C	min. 5 years

The material does not lose its high quality performance after repeated openings of the container.

### Order information

No.	Product	Unit
14	MM-Release agent, liquid	100 ml

### Availability

Technical data sheets are generally available in German or English language. MM-Release agent is delivered worldwide within short time by MultiMetall. In addition to that our products are internationally available from many MultiMetall-partners. Ask for further products from MultiMetall.

### Note

The product information and instructions provided in this leaflet were prepared to the best of our knowledge and serve information purposes only. We recommend that appropriate tests are carried out prior to application in order to ensure that the products and methods fulfil the purpose desired by the user. In this procedure, the given data may serve as a basis. Application and processing of the products lie outside our possible control and are therefore the sole responsibility of the user.
